

Neighborhood Notification: Bicycle Improvements on Mayo Boulevard from 56th Street to 64th Street

As part of the Street Transportation Department's core mission, we strive to improve the City's roadways to create a safe and efficient transportation network. Our ongoing pavement maintenance program provides opportunities to change the current traffic lane striping to improve safety for people who walk, drive, ride bicycles and use transit.

About the Project

Where: Mayo Boulevard from 56th Street to 64th Street.

What: Where there is enough space on the roadway, bicycle or buffered bicycle lanes will be added. The number of travel lanes will remain the same. This project does not remove or add parking.

When: Pavement maintenance (new asphalt) is scheduled for summer 2021 and traffic lane improvements will happen shortly after.

Why: Buffers add space between people driving and people walking or biking for increased protection from vehicles, improved safety and added comfort. Additionally, the slight narrowing of the lane widths to accommodate the bicycle lanes will help to guide cars and deter speeding.

What Will the Project Look Like?

Current Travel Lanes
